#### For Other Lengths.

					L	ENGTH	s	
7 9	11	139	15	)For*( 32	34	36	38	40
14+2 18+2	22+2	26 + 2	$30 \div 2$	For*  32  Take  2×16	14 + 20	$2\times18$	18+20	2×20
42 6 44 20+22 2×22								
20+22 2×22	20+26	$2\times24$	24 + 26	Take 2×26	24 + 30	$2\times28$	28 + 30	2×30

<sup>\*</sup>Explanation—For 40 pieces 2x8, 34, take the sum of 40 pieces 2x8, 14, and 40 pieces, 20; again, for 13-foot stock take half of 26. For 32-foot stock take twice quantity given for 16-foot.

SIZE-INDEX, 5th Edition—Table A—Equivalents.

Re-For the feet board measure (b.m.) to the foot lineal in every size see page 336. See explanation, page xi.

#### EXPLANATION.

The Loader's Tables contemplate loading the full thousand feet, taking the nearest number of whole pieces that will make it without a whole piece over. A customer ordering 3000 feet of 1x8 16 would receive 282 pieces, making 3008 feet, with which he would be charged instead of with the even 3000. The quantity over is indicated by the small figures to the right of the number of pieces. How many 12 inch boards 12 foot for 5000 feet? Run down the 12 foot column in 2x6 table until opposite 5000 in the center and read 417, making 5004, the 4 feet over being indicated by the figure to the right.

ALL WIDTHS BOARDS. To get the feet of line use 2x6 table. How many feet of line for 1000 feet 14 boards? Run down 14 foot column until opposite 1000 and read 72, which will make 1008 feet as indicated.

BATTENS AND MOULDING. How many 16 foot bats for 7000 feet? Run down 16 foot column (2x6 table) until opposite 7000 and read 438 pieces, which make 7008 feet, the 8 feet over being indicated by the small figure to the right.

### PREFACE TO FIRST EDITION.

The auther entered the lumber trade in 1884, and knowing the general use made of tables to save time and labor, and to secure accuracy, he was surprised to find lumbermen still figuring and refiguring bills, invoices, estimates, etc. The careful figures of yesterday, though practically the same for to-day, to-morrow, and forever, were put to no permanent use-all must be figured over again-a veritable task of Sisyphus. They figured up the hill to-day only to begin at the foot tomorrow and figure up again. Believing this a worse than waste of time, for there was no fun in it, an attempt was made to buy a book of practical tables, and it was immediately discovered that the prophet did not refer to the lumber trade when he said, "Of making many books there is no end," but on this subject probably would have said, "Much figuring is weariness of the flesh." However, being convinced that a book of practical tables was possible, and therefore "a consummation devoutly to be wished," the author went at it, and as the result of long and painstaking 

When it is once accurately determined, for example, how many pieces of 10-inch shiplap 14 feet long to load for 590 feet, or how many pieces of 4-inch flooring 16 feet long, for 3450 feet, and to what they amount, say at \$22.75 per M, it must be admitted a waste of time for every lumberman to figure out daily-yes, hourly-practically the same thing, instead of referring to the "Actuary" for the result as he would to his watch for the time of day. This is all the more important to lumbermen, for they figure many bills they do not sell, make many estimates of which passing time brings them no tidings, all in addition to their actual business. Surely there is a lesson for lumbermen in other lines. They should 'Consider the banker, the grain man and the coal man, how they do; they figure not, neither do they err. Therefore I say unto you that Crossus in all his wealth progressed not like one of these.'

Cheapness and Goodness are two horses traveling so wide apart that sensible people rarely attempt to straddle them. In the making of "The Lumberman's Actuary" 'judicial notice' was taken of numerous "cheap book" attempts and of the further fact of their very successful failures from the standpoint of the practical lumberman. So be it distinctly understood that an attempt at a cheap book was not even thought of. On the contrary, no efforts or expense were spared to secure absolute accuracy and perfect readiness of reference.

For instance, to secure accuracy, every one of the 231 pages, every one of the nearly one hundred and thirty thousand separate calculations, were figured carefully through eleven times. So sure is the author of its accuracy, that a copy of the book, or its price in cash, will be given to

the person first reporting each material error.

e - Tara en a tarant. O

To get the form most easily referred to, the pages were written and rearranged five times, the effort being to get a form as easily referred to

as an open-faced watch.

The type is large and distinct and was made expressly for this book, so that the light and full-faced type might be used in alternate columns on the same page and yet have the figures in perfect line both up and down and across the page. This is very valuable and something never before attempted in a book of this kind. By its means, and without even pointing, the eye will instantly catch the right result every time.

In short, the attempt, the ambition, has been to produce the very best possible book in every important particular; to anticipate the perfection of the dawning morning of the twentieth century; to produce a book in every way worthy of the great trade for the use of which it is prepared; a book of which lumbermen, always critical and discriminating, may, when they see it, exclaim with the fervor of Archimedes of old, "Eureka." J. W. B.,

Fairbury, Nebr., June 1, 1893.

Fairbury, Nebraska. JOHN W. BARRY, morte collecting of the rabber s Cedar Rapids, Iowa, June, 1909.

#### EXPLANATION OF MONEY TABLES.

#### LUMBER FROM 5 CENTS TO \$75 PER M.

Run down the column headed by the even hundred until opposite the	
desired quantity in the center, and read amount, thus (page 278):	
Am't of 2 ft. see 98 column, opposite 2 in center column \$0.15	
Am't of 602 ft. see 600 column, opposite 2 in center column 44.85	
Am't of 844 ft. see 800 column, opposite 44 in center column 62.88	
Am't of *845 ft. see 800 column, opposite 44 in center column 62.95	
Am't of 25844 ft. proceed as above for the 844 \$62.88	

For the 25000 ft. see bottom under 5 and opposite 20 in center, 1862.50=1925.38 \* For 845 feet, or whenever odd feet, as 1, 3, 5, etc., occur, add mentally half the amount of 2 feet, always the first figure in the "2 to 98" column.

#### CHECKING CAR INVOICES.

For invoices at prices not multiples of the quarter (25c) as \$17.05, \$17.35, \$17.70, etc., the price over the quarter (25c) can never be anything but 5, 10.15. or 20 cents. In such cases read the amount below the nearest even dollar, quarter (25e), half (50e), or three-quarter (75e), and then for the 5, 10, 15, or 20 cents over, add mentally the amount at these prices, for which see pages 1 to 3. Thus: 854 feet at \$74.65 = \$63.75. Is it right?—

854 feet at \$'	74.50 (see p. 27	8)		 \$63.62	1 41
854 feet at	.15 (see p. 2)	Size Lukye		 13	X T
A JUST THE PART OF A	of of the same of	NO LORSES	of for the	3 9	83.75

All done without making a figure of course.

unter of which passing lines

et festre en glie par m

#### MOULDINGS.

In applying the tables to mouldings proceed exactly as in lumber. Thus: 268 feet No. 8269 Listed at \$7.45. Run down the 200 column (page 278) until opposite 68 in the center and read \$19.97. Proceed in like manner for all other mouldings.

FREIGHT. Consider the point to the left one place.

The tables apply to all freight rates from 6 cents to 75 cents a 100 pounds, advancing by quarter cents, as 6c, 61/4c, 61/2c, 63/4c, 7c, etc. For example, the freight on 5 to 2 red cedar shingles, 180 pounds, at 741/2c is found by proceeding exactly as if the 180 were feet of lumber but in the final result consider the decimal point 1 place to left, thus: 180 @ 741/2 = \$13.41, and considered with point to left 1 place is \$1.34. CAR FREIGHT.

Alati mali and all the area

se un execultare unite

Proceed as it lumber,	inus:	30840 pound	us on a 74	% rate.	pee hake	210.
For the 840, see 800 colum	n, op	posite 40 in	the cent	er		62.58
For the 36,000, take doub						
		- 1 1 5 %	100 003 3	DIVITOR 84	Olli Vu	LOTON
		A Talles and		i de la companya de la	3 697	744 59

Considering the point 1 place to left, or \$274.45, the correct amount.

# LATH AND SHINGLES.

From 85 cents to \$6 per M. See pages 344 to 369.

Thus: 6034 M at \$3.40; for the 60 M run down \$3.40 column until opposite 60 in the center and read \$204.00, and then add for the 34 M the \$2.55 given at the bottom opposite 3/4, or in all, \$206.55. Proceed likewise in other cases.

#### nave and it with a name BY THE BUSHEL, and a riber mails a

In computing articles by the bushel the Actuary applies accurately on all prices beginning with 6 cents and running up by quarter cents to 75 cents a bushel. Example, 87 bushels of corn at 291/4 cents a bushel. Add a cipher, thus: 870, and find amount at \$29.25, which is \$25.45. Proceed likewise in all similar cases. mand and delicher in onem

#### BY THE HUNDRED.

It applies also to articles estimated by the hundred pounds. Example: A hog weighing 372 pounds, at \$3.25 per hundred pounds. Referring to \$32.50 in the index, the amount is \$12.09. Covers all cases to \$7.50 a hundred.

Note-Variations of 1 cent and under not regarded as errors.

#### EXPLANATION OF THE SIZE TABLES.

PIECES GIVEN, TO FIND THE FEET.

How many feet in 22 pieces 11/4 x 5 16'? See 16-foot column (page 292) opposite 22 in the center, 183 feet.

How many feet in 322 pieces 11/4 x 5 16' P

\$10

11

12

13

14

15

16

17

18

19

20

4 11 905 608

For the 22 pieces proceed as above...... For the 300 pieces, see 16-foot column at bottom opposite 300 in center, 2500 ft.

Total in the 322 pieces.....

#### MULTIPLES.

How many feet in 24 pieces 11/4 x 10 8'? As 11/4 x 10 is twice 11/4 x 5, the following is at the top of page 292 "For 11/4 x 10 multiply by 2." Therefore find for 24 pieces 11/4 x 5 8' by running down the 8-foot column until opposite 24 in the center and read 100 feet which is doubled for 11/4 x 10, making 200 feet. Or the feet for double the number of pieces may be found with the same result.

Again—the contents of smaller sizes may be obtained by dividing, thus: How many feet in 35 pieces 11/4 x 11/4 9'? Run down 9-foot column until opposite 35 in the center and read 164, which divided by 4 gives 41 feet as the contents of 35 pieces 11/4 x 11/4 9'?

Note. In using multiples as above, there are a few cases in which a minor fraction of a foot having been dropped or added, the final result will vary slightly from the mathematically exact one. Such results are not considered errors.

#### FEET GIVEN, TO FIND PIECES.

In 250 feet 11/4 x 5 16' how many pieces? Run down the 16-foot column, page 292, until 250 is reached and read in the center 30 pieces.

#### EQUIVALENTS.

For 7x9 16' the index refers to (p.o.) page opposite at B B., showing that 7x9 16' is the same as 3x14 24'. Therefore, for 35 pieces 7x9 16' read contents of 35 pieces 3 x 14 24' (on page 312), or 2940 feet.

#### BATTENS. Page 298.

How many pieces 18 feet long for 1584 feet? Run down 2x6 table in 18-foot column until 1584 is reached and opposite in center read 88 pieces.

#### FEET LINE. Page 298.

How many feet of line of all width 14-foot boards for 1218 feet? Using 2 x 6 table, run down 14-foot column until 1218 is reached and opposite in center read 87.

#### ODD.

The feet board measure (B. M.) to the foot lineal for all sizes will be found on pages 336 to 352. See explanation bottom page 341. You have sawed 500 pieces 2x41/2 16'; how many feet? On page 336 run down the 2-inch thick column until opposite 41/2 in the center and read .7500 or 3/4 of a foot B. M. to the foot lineal in 2x41/2 or 12 feet to the 16' piece, and in the 500 pieces a total of 6,000 feet.

#### ESTIMATING.

Errors in estimating occur most frequently from omissions. Such errors may be systematically avoided by following the list of items beginning on page 372, and including such of them as apply to the construction under

The carpenter-labor-cost is based on a wage of \$2.50 a day. For a \$2.75 basis add 10 per cent to the final sum for carpenter labor; for a \$3.00 basis add 20 per cent, etc.
